

# Project management in IT

With passion to success

## What is project management?

- Everything and nothing
- Communication
- Leading
- Planning
- Controlling
- Change Management

## How can we support you and what are we doing?

- We prepare you and your company for technical changes and support you in their implementation
- We support you in cost considerations and comparisons for the use of IT components
- We see ourselves as "midfield players" in the active follow-up of upcoming tasks and measures
- Taking over project leadership in time-critical projects (fire extinguisher projects)

## What is your benefit as a client?

- Due to our experience in IT infrastructure, our project management is sensibly tailored to IT projects
  - We ask the right questions at the right time from our best practices
- We have great know-how in the field of IT infrastructure components
  - We translate between IT and specialist areas and communicate in a targeted manner
- We think outside the box
  - We always have the big picture in mind in order to achieve our desired goal
- We provide support at every stage of your projects
  - From analysis to implementation
- We work in the spirit of the customer and offer customized project management
  - Think of us as internal employees, we love this job

## Challenges of IT project management:

- Changes in scope or project timeframe
- Integration into the processes of your company
- Acceptance by your employees
- Adaptation of goals to new strategies
